Dear valued customers!
 Thanks for your interest in our products.
 With the slogan **“Manufacturing professionally from the simple thing can make products with top quality”**, we make an effort to improve and innovate production processes, management systems and high-tech machinery systems.
 We strongly believe that we will make customers satisfied with our products when having cooperation.

Long Thanh GMT Viet Nam specializes in the field of mold and jig manufacturing, machine parts, automatic and semi-automatic machinery, CNC lathe, and milling mass production. Especially machining large and extra-large machine parts.
 Our main customers are Japanese companies. With a team of highly-skilled, experienced engineers, synchronous machine systems, production processes as the ISO standard 9001-2008, 5S, and so on, we always satisfy the customer demand, even strict customers.

With experienced engineers in the field of plastic molds, punching molds and aluminum molds, we always ensure a closed process from design, manufacturing, assembly and testing to create products with high complexity and accuracy.

With the modern machinery system, our experienced technical team produces a variety of machine parts with the accuracy reaching 2/1000.

Being one of the top companies of manufacturing jigs, we make welding jigs, test jigs, machined jigs, etc with the accuracy reaching 2/1000 and the highest aesthetic.

We have been creating automatic, semi-automatic transmission line systems and high-tech solutions with the aim of catching up with the industry 4.0.
